NEW Countertop Film
Renew. Protect. Elevate.

TGA®

TGA®

Flexible
Architectural
Finishes

TGA® Decorative Film is a decoration material of self-adhesive film for indoor and outdoor decoration. It has advantages of rich color, high simulation texture, convenient construction and high flame retardancy.

Compared to the traditional decorative surface materials,TGA®can complete construction more cleanly and quickly, which is both cost-effective and capable of meeting the needs of designers.

Renovation-Color change-Reinforcement
Decorative Wrap

Create for your desire.

A molecular-level technology that can reshape the space is presented by its thinness, lightness, and functionality, allowing the products to easily cope with daily life, and to be more able to challenge the extreme harsh environment.

Live with green, live with nature.

The natural beauty of the space can be regenerated by environmentally-friendly materials and modern technology. To enjoy rather than to consume the nature is the want of TGA®.

Grasp inspiration, express freely.

Prompt products design in the trend of fashion. It is through the CMF concept to explore the profound value of material and to inject artistic ingenuity into every aspect of the space so as to release extraordinary creativity freely.

ES-647　SP-2105　MC-461

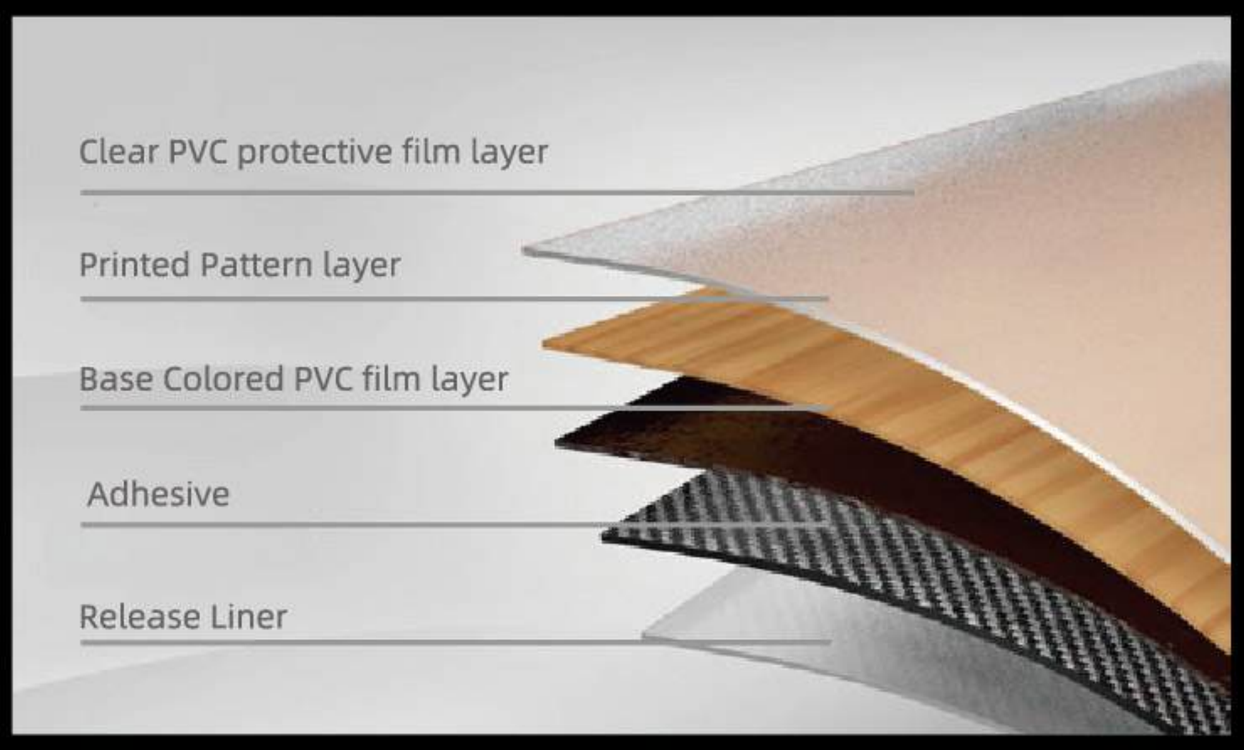

Featured Benefits of TGA® Flexible Architectural Finishes

Finishing solutions for interior and exterior decoration, furniture, advertising signs, transportation wrapping etc.

Substrates - Use on metal, wood, glass and more.

Aesthetics - Resemble natural materials and other types of surfaces to deliver the look you want.

Remodel and Reuse - Goes up fast, with less likelihood of errorand waste, and bring life to existing assets. The architectural finishes convert wood or metallic spaces to reflect an entirely new design with abstract or colored finishes.

EN-13501-1
B1-Grade fire protection

GB environmental certification

3D surface wrapping

Anti-pollution and moisture proof

Easy to clean

Mildew-proof Antimicrobia

Vivid effect of natural materials, a variety of colors can be arbitrarily selected.

Can be customized according to customer requirements.

More efficient installation. Many substrates styles can be applied, and be quickly refurbished.

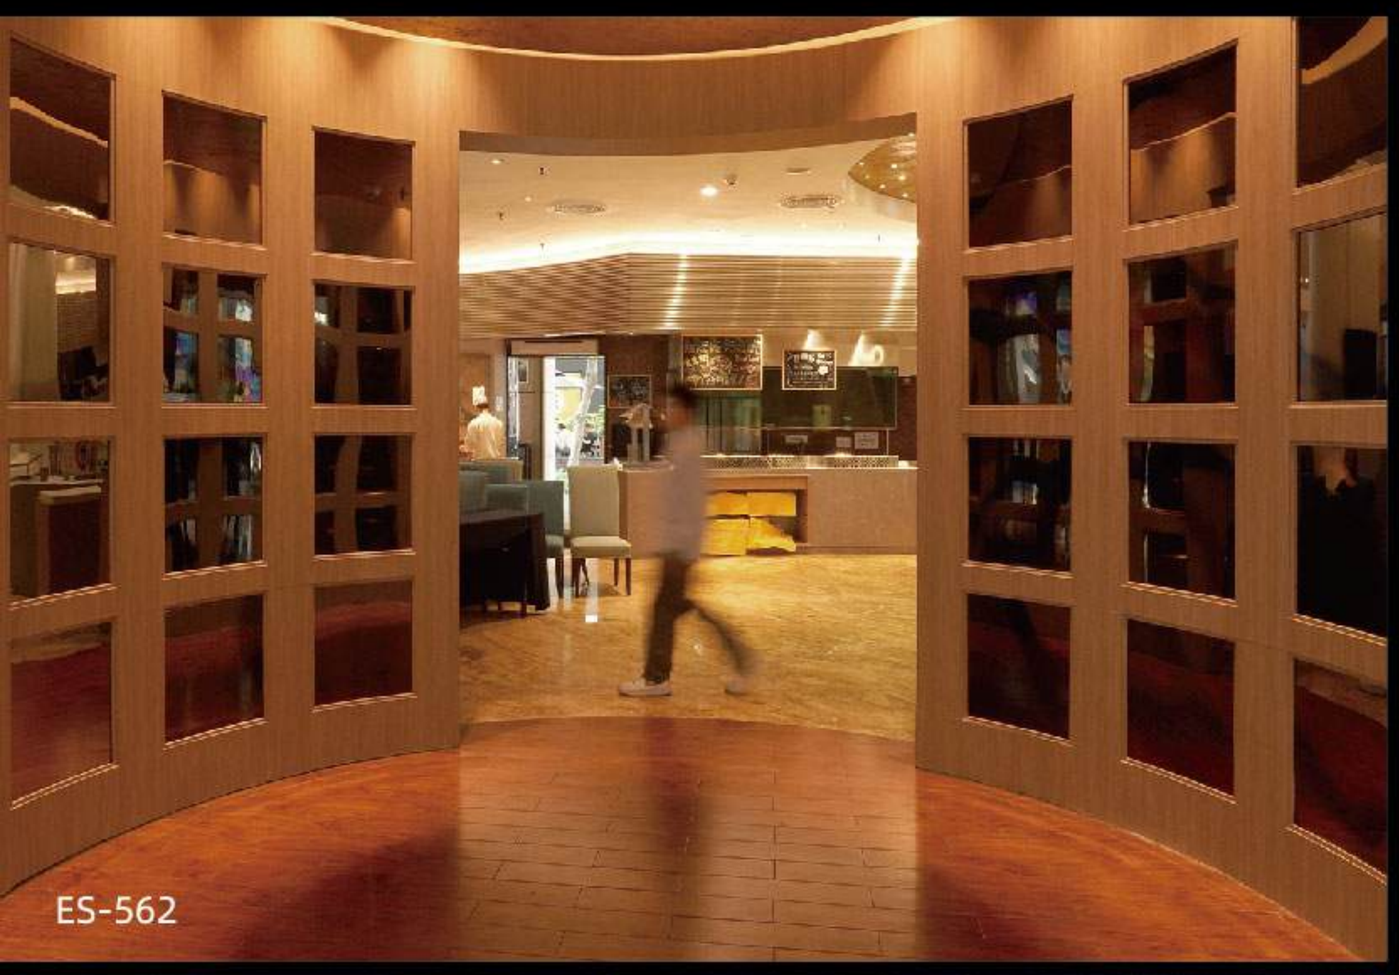

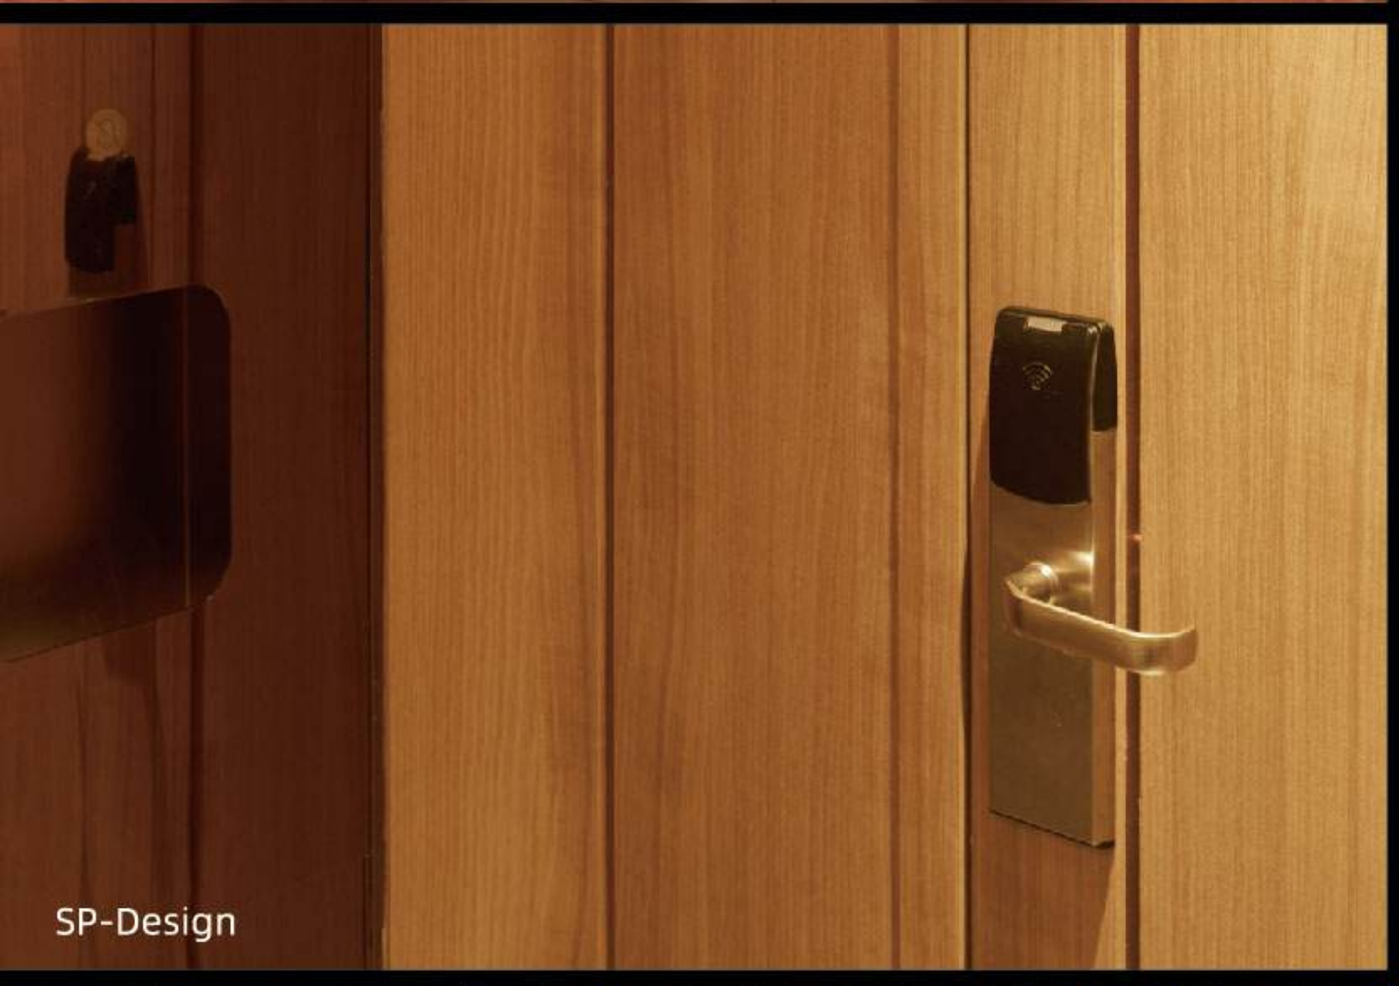

Non-toxic and smell-free. No noise during construction.

Solid HS/CS Series

The Pure Matt series applies a renovation matt technology, allowing the light to have a diffuse reflection on the surface which can effectively help reduce the sharpness of the reflected light. Additionally, the soft-touch surface is designed to be resistant to dust and scratches ensuring ease of cleaning. This series can provide you with a material design for your space.

The MC series precisely mimics stainless steel texturing. It fuses various metal colors and grains, forming a clear matrix for designers. With classic combos, it restores metals' features, enabling each space to find its perfect match among many choice.

Wood

SP Series

Based on the real tactility and appearance of wood, the series of TGA® SP applies the classic technique of wood processing, namely polish and coating treatment to the production of wood grain film. What's more, it breaks through the original technical boundaries via innovative techniques to equip the film with unique concave-convex stereo materials. Therefore, the layers are penetrated by realistic and exquisite texture, so that the natural vitality can be freely expressed in different spaces.

Physical and Chemical Properties

Ideal Application Temperature Range

15 ~ 25°C

Usage Temperature

The film was applied to an aluminium plate and exposed to temperatures in the range of -20°C to 65°C for 5 days

Test Result: No peeling or discolouration

Storage Conditions

Store film in a clean dry environment free from direct sunlight and at an ambient temperature below 35 °C.

Minimum Application Temperature

5°C
(Use jet-heaters to warm up surrounding area before applying in low ,temperature environments.)

Application Process

Surface preparation and priming for various substrates

SUBSTRATE / SURFACE PREPARATION	Wood Luan Veneer Chinese Veneer Hardboard	Plaster Board Calcium Silicate Board Asbestos Slate	PVC Coated Steel TGA Applied Over TGA	Mortar	Bonderized Steel Plate Baked Enamel Paint on Steel	Aluminium Plate Stainless Steel
